

## Using the Edge Sander

- Wear your protective equipment including ear defenders, dust mask and goggles.
- Tilt the edge sander onto its back edge before switching it on.
- 3. Let the edge sander run up to full speed before lowering it carefully onto the surface. Be prepared for the reactive force when the sanding disc contacts the edge surface.
- Keep the edge sander moving across the floor all the time it is running, do not let it remain still, it may cause grooves in the floor.
- Apply only moderate pressure to the machine. Any extra pressure will overload the machine and may cause grooves in the floor.
- Keep the sander clear of central heating and other pipes at floor level it can damage them.
- Keep the cable clear do not let the machine run over it.
- If you think the cable may be cut or damaged in any way, switch off and unplug at the socket before inspecting it. If the cable attached to the edge sander is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- Take care not to accidentally pull the plug from the socket.
- Watch out for signs that vibration may be affecting your hands. If your fingers start to tingle or feel numb, take a short break from using the machine. Exercise your fingers to encourage blood circulation. Ask the hire company for a copy of the HAE leaflet no. 2150 - Hand-arm vibration or visit www.hse.gov.uk/vibration
- To help prevent vibration affecting your hands, operate the machine for shorter periods. Keep your hands warm - wearing gloves may help do this.
- Tilt the edge sander off the floor surface before switching off and wait for the disc to stop completely before you put the machine down.
- Make sure that any ventilation slots in the edge sander do not get blocked with sawdust.
- Remember to empty the dust bag when it is half full or when you stop work: but do not empty the sawdust onto a fire. Switch off and remove the plug from the socket before leaving the edge sander
- unattended If your equipment does not work properly do not attempt to repair it. Contact the hire
- company.
- You may want to read this leaflet again. Please keep it until you finish work.
