1423 Safety Guidance

Using the Power Barrow

- Exercise caution when travelling up slopes or uneven ground and avoid turning on them. Do not operate tipping controls when facing down a slope.
- Do not exceed the Power Barrow's rated capacity (load limit) as it will reduce the machine's stability.
- Do not locate the Power Barrow alongside open trenches unless they are adequately supported with trench props. Do not position the machine alongside if persons are working
- Tracked machines should be parked on timbers during extreme weather to prevent tracks
- You may want to read this leaflet again. Please keep it until you finish work.

Please keep this leaflet safely as it may be required for future reference

Power Barrow

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

It is important to read this entire leaflet BEFORE using the Power Barrow

- It is important to read all of this leaflet and any others provided before you use the power barrow.
- Petrol is highly flammable. Take care not to cause a fire or explosion. This power barrow is designed to take loads up to a maximum
- weight, as stated on the machine's rated capacity plate.
- The action of this power barrow can cause injury or damage if the equipment is not used in a careful and controlled way. You should not operate the power barrow unless you have had
- previous experience, or you have received professional or practical instruction from the hire company.
- If you have not used a power barrow before, familiarise yourself with how the machine works before you start on the main task.
- You should not attempt to load or unload the machine from a truck or trailer unless you are fully experienced in doing so.
- Plan your work and think ahead to make sure that you will always be working safely.
- You should have at least the following items of personal protective equipment: Goggles or face shield to a minimum of EN166 B: Boots or protective footwear to a minimum EN345: Ear muffs giving protection for levels up to 101 dB(a); Gloves. Note - EN number represents European
- This power barrow must not be used by minors, or by anyone under the influence of drugs or alcohol
- 11. Never operate this power barrow on any public road or highway.
- This power barrow is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.
- Do not leave the power barrow unattended at any time.
- 14. Always remove the keys from the ignition before leaving the machine.
